(Rockford) -- If you are looking to cut back on your cell phone bill, one statewide organization has some tips that might prove useful.

The Citizen's Utility Board, or CUB, held a press conference today in Rockford looking at cell phone usage.

A new report shows that many cell phone users are paying for calling minutes they never actually use. The study also looks at how average callers could save hundreds of dollars a year on their wireless bills.

For more information, visit the Citizen's Utility Board's website.
