Petition to the Illinois Commerce Commission

I urge you to reject ComEd's latest rate increase request that would cost consumers $361 million more on their electric bills each year. ComEd does not need or deserve such a big rate hike. Its parent company, Exelon, posted a profit of $2.9 billion in 2007.

An analysis by the Citizens Utility Board (CUB) shows the company has overstated its expenses and understated its income to justify the increase. The ICC's own staff also says ComEd does not need such a big rate hike from consumers.

Affordable electric service is a necessity for Illinois consumers. Please protect ComEd customers from this unjustified rate hike.
