

Save Money and Support Clean Energy. No Rooftop Panels Required.

Community Solar programs allow utility customers to subscribe to a local solar farm and save on their electricity cost without having to install solar panels.

1 Subscribe to a local Nexamp solar farm

2 Support clean, solar energy on your utility grid

3 Receive credits on your utility bill and save on your electricity cost

THE BENEFITS:

Save up to 20% on your annual electricity supply cost.*

No installation of any equipment on your roof or property.

Your utility will stay the same, and you can continue using a third-party supplier

No upfront costs or long-term contracts that lock you in for years.

Support solar power and demonstrate your commitment to renewable energy.

No credit check.

*Your payment is equal to the value of bill credits, assuming the default electricity supply charge with your utility, minus your discount of 20%

FREQUENTLY ASKED QUESTIONS

Am I eligible to enroll?

If you are in Illinois and pay a ComEd or Ameren electric bill, you are eligible to participate (even if you have a 3rd party supplier, or alternative retail electric supply).

What is my discount?

You will receive a 20% discount on the bill credits applied to your utility bill from your solar farm share. The 20% discount is compared to your utility's default electricity supply charge.

How is my solar allocation determined?

As part of the subscription process, you will provide your latest utility bill to Nexamp so that we can analyze your monthly electricity usage. Nexamp uses that information to allocate a share of the solar farm that should earn you enough credits to offset nearly all of your annual electricity supply charges.

Am I guaranteed a discount for a specified period of time?

You are guaranteed the same discount on your credits for 15 years. However, you may cancel your contract at any time without penalty. It may take up to 90 days for the cancellation to go into effect.

Is there a penalty for canceling my subscription?

No. There are no penalties or termination fees. Should you choose to leave the program, it may take up to 90 days for the cancellation to go into effect.

Do I get two bills?

Yes (for now). Nexamp will send you a monthly invoice for your share of the farm, and you'll continue to receive your regular electricity bill, minus your earned credits. You can sign up for automatic bill pay with Nexamp, which can alleviate any extra work.

Does this mean I no longer receive power from my local utility?

No. Your power will still be delivered to your home by the same utility – Nexamp will just feed energy into the utility grid. If there's ever a problem or outage, you'll get the exact same service from the exact same people.

Do I have to switch my utility or my energy supplier?

No. If you are purchasing power through a municipal or county aggregation program, from a third-party energy supplier, or alternative retail electric supply, you can continue to do so. Enrolling in community solar is a good way to further reduce your electricity costs without impacting your relationship with your utility.
